

CAREER RESOURCES

Remember that career exploration is an on-going process. There are no simple answers, no one can make the decision for you, and that it is a process that takes work and patience.

As part of your career exploration journey:

Talk to parents, friends, relatives and neighbors about their jobs.

Explore all of your resources on-line, in the newspaper, and in books.

Visit the Guidance Center and explore that technical college, public university, and private university catalogs. The catalogs will provide you information on majors and the courses that you need to prepare yourself for your future. There is also information on the world of work and the military. See Mrs. Paszek, Mrs. Miller, or Mrs. Weyer for more information.

On-Line Resources To Get You Started:

Occupational Outlook Handbook: Gives information on what workers do, working conditions, training needed, education, earnings, and job descriptions.

<http://www.bls.gov/oco/>

Career Zone Holland Self-Assessment: Provides free career exploration and planning.

<http://www.nycareerzone.org/>

Career Key: Gives more information on the Holland Personality Type and jobs that may fit you.
