

SCHOOL DISTRICT OF MAYVILLE

411.1

GENDER EQUITY

The School District of Mayville believes that gender equity must exist in order for students to reach their maximum potentials in and out of the classroom environment. Students must have access to classes and activities in which they have an interest. Along with access, needs to come an atmosphere free of intentional or unintentional discrimination.

Gender equity provides a quality learning environment for all students, which in the end also gives students the best education possible.
