SCHOOL DISTRICT OF MAYVILLE

920

FACILITY PLANNING

A committee shall be established to study school building usage and the condition of school buildings and sites in the District. The committee shall be made up of Building & Sites Committee of the Board of Education along with administrators and supervisory staff members who shall work with appropriate experts, such as architects, who can provide the committee with complete feasibility studies. The committee shall make its recommendations to the entire Board in order to correct identified facility and site deficiencies.

The Board shall set priorities in establishing a method of correcting identified facility or site deficiencies. The Board shall present recommendations for correcting facility and/or site deficiencies to school district electors when required by law.
